

THE WHAT, WHY, AND HOW OF BUILDING AN INTERDISCIPLINARY ATRIAL FIBRILLATION PROGRAM

February 27, 2020

Dinner program
6:00–9:20 p.m.

Sheraton Park City
Park City, Utah

YOU'RE INVITED!

February 27, 2020

We invite you to join us for a multidisciplinary discussion about setting up an atrial fibrillation clinic.

This program is intended for clinicians attending the 13th Annual Western Atrial Fibrillation Symposium, February 28-29, and will commence one day prior to the general sessions.

This rapid-pace program features a multidisciplinary panel of experts that will:

- Identify steps to develop a comprehensive, multidisciplinary atrial fibrillation program
- Consider the clinical and economic factors relevant to implementing a program
- Discuss utilization of EMR data to identify gaps in care
- Assess the benefits of utilizing and integrating device therapy in the AF care pathway
- Identify steps to coordinate care between various providers treating the AF patient
- Discuss available protocols to potentially reduce AF admissions
